About me

Motivated Computer Engineering student from the University of Ruhuna with hands-on experience in full-stack development. Skilled in authentication, role-based access control, and DevOps practices. Experienced in team leadership, software testing, and project management. Seeking a software engineering internship to apply technical and leadership abilities while continuing to grow as an enthusiastic learner.

Skills

Languages: C++, Python, Java, JavaScript

Developer Tools: VS Code, IntelliJ, Git, Android Studio, Docker, Figma, Adobe XD, Postman, Jenkins

Technologies/Frameworks: Spring Boot, React, MySQL, PostgreSQL, MongoDB, HTML, CSS

Version Control: Git, GitHub

Design Principles: User-Centered Design, Accessibility, Interaction Design

Projects

Management Information System (on going)

- Designed and implemented Phase-2 of the Management Information System for the University of Ruhuna, supporting students, lecturers, and administrators.
- Contributed to frontend development of transcript generation and implemented role-based registration for students and lecturers in both frontend and backend.

July 2024 - March 2025

🌐 [MIS Frontend](#)

🌐 [MIS Backend](#)

Technologies: [Springboot](#) [Reactjs](#) [PostgreSQL](#)

Task Manager Application

- A full-stack task management system with crud application, user authentication, task prioritization, and status tracking.

April-2025

🌐 [Task Manager](#)

Technologies: [Springboot](#) [Angular](#) [MySQL](#)

Course Registration System

June-2024

- Developed a full-stack system for course registration where admins can register students for courses and manage details.
- Home page displays enrolled students, available courses, and a course registration button then it allows users to view enrolled students and available courses.

Technologies: [Spring Boot](#) [React](#) [MySQL](#)

Multiple Player Bike Game using Socket programming

February-2025

- A real-time multiplayer bike game using socket programming and multithreading. The server manages connections, while clients send and receive game data.
- Sockets handle communication, and threads ensure smooth gameplay for multiple players.

🌐 [Bike Game](#)

Language: [Java](#)

Employee Management System

August-2024
 [Employee](#)

- Admin can add new employees via a "Post Employees" feature.
- View and manage employee details (delete and update) through the "Employees" section.

Technologies: [Springboot](#) [Reactjs](#) [MySQL](#)

Hand Written Digit Recognizer(Machine Learning Project)

December-2024

- A handwritten digit recognizer was implemented using the MNIST dataset. Both SVM and k-NN were tested, and SVM achieved the highest accuracy of 98.6

Models: [SVM](#) [KNN](#)

Education

Faculty of Engineering, University of Ruhuna
Bachelor of Science in Computer Engineering

Feb. 2022-Present

G.C.E Advanced Level
Bt/Vincent Girls' High School Z-Score 1.7260

2017- 2020

Extracurricular

Member, Education Incentive Association of Batticaloa

association focused on improving students' educational growth. Contributed to a teaching project by conducting physics lessons for A/L science stream students.

Certifications

- Problem Solving (Basic) - Certificate, 2024
- Foundations of User Experience (UX) Design

Non-technival skills

• Communication Skills • Team Collaboration • Time Management • Problem Solving
